

# NS ENHANCED SECURITY

ENSURING BOTH STABILITY  
AND DURABILITY

The **NS** Series from DBCI incorporates an enhanced design that includes anchored guides on the floor, ensuring both stability and durability. A robust lower bar, equipped with secure clips that smoothly glide within the guides, combine with firmly anchored guides on the floor to provide elevated strength and support. Ideal for light-duty use in carports, barns, sheds, and commercial unit mix.

## NS+ DOOR

- **Suitable for door replacements and new construction.**
- **SIX** 9-gauge SECURITY CLIPS that extend fully into the guide.
- Firmly anchored with 14-gauge SUPPORT ANGLES screwed into the floor for enhanced stability and support.
- Roll formed clear acrylic coated galvanized steel BOTTOM BAR reinforced with a 1-1/2" x 2" x 12-gauge full width galvanized angle.
- Lift handle(s) installed on exterior side of bottom bar with interior stop clips.

## NS RETROKIT

- **Can be installed on existing doors.**
- **TWO** 9-gauge SECURITY CLIPS that extend fully into the guide.
- Firmly anchored with 14-gauge SUPPORT ANGLES screwed into the floor for enhanced stability and support.
- Roll formed clear acrylic coated galvanized steel BOTTOM BAR reinforced with a 1-1/2" x 2" x 12-gauge full width galvanized angle.
- Lift handle(s) installed on exterior side of bottom bar with interior stop clips.

All doors that are 8'-0" wide or larger will include a secondary reinforcement angle to support the bottom bar and prevent bending caused by the extended spans.
